OBJETIVES

Knowing the origins of the Spanish labour movement
Studying its evolution along the time, focusing on the most important trade unions

CONCLUSIONS

The utopic socialism and the Catholic labour movement had a very small development in Spain

The socialist Trade Unions (UGT) and the anarchism were successful until the Spanish Civil War (1936-1939)

Since the Spanish democratic transition, the main trade unions are UGT (near PSOE) and CCOO (near Unidas Podemos)
